DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 39-74, drawn to a mobile washing apparatus.

Group II, claim(s) 75, drawn to method of treating objects.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II each include the common technical feature, a collecting pad for cleaning of an aircraft.

However, this technical feature do not constitute over the prior art. For example, U.S. Patent 5857646 shows a collecting pad for cleaning of an aircraft (col 1 ln 45-57).

3. If group I is elected for further prosecution on the merits, Group I contains claims directed to the patentably distinct species of collection pad type as exemplified by claims 49, 58, and 60. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

4. The species are as follows: the species where collection pad has inflatable parts that form part of said barrier parts are designated as longitudinally extending parts comprising at least two chambers extending along each other, the species where the flexible base pad comprises at least two parts connected to each other to form said base part by means of complementary connecting means that are substantially fluid-tight and may be disconnected from each other, and the species where the flexible pad comprises at least one incision.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise require all the limitations of an allowed generic claim. Currently, claim 39 is generic.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

6. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

Art Unit: 1714

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
